Kopparberg is known for its fruit refreshment within cider and spirits. Through innovation and following our own path, we have made Kopparberg a strong, independent drinks brand around the world.

Kopparberg Cider is a refreshing alcoholic drink traditionally made from the fermentation of apples or pears. We start with the basics and then add fruit juices. Since we pioneered the fruit cider category, it has successfully delivered different variants to consumers all around the world.

THE SPIRIT OF KOPPARBERG

As experts in premium fruit refreshment,
we invite gin, vodka and rum enthusiasts to
taste the spirit of Kopparberg.

THE SPIRIT
OF KOPPARBERG

THE SPIRIT
OF KOPPARBERG

Sofiero is a well-hopped pilsner, with a bitter taste and the body to back it up. Sofiero's characteristic burnt flavour adds an extra touch to this refreshing lager.

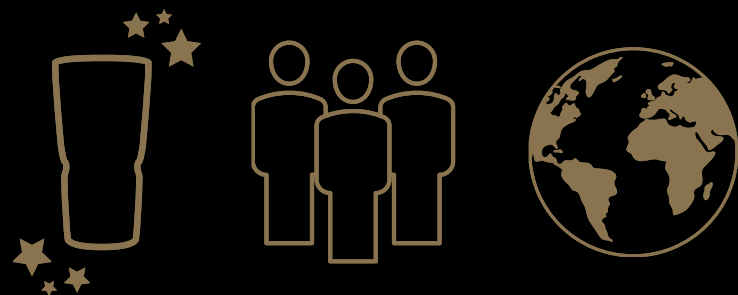

ZEUNERTS
HÖGA
KUSTEN

Höga Kusten is a unique beer and we let the bridge in North of Sweden, Höga Kusten, tell its story. On one side we brew the lager and on the other side we brew the ale. Höga Kusten brings them together to create uniqueness to the beer category.

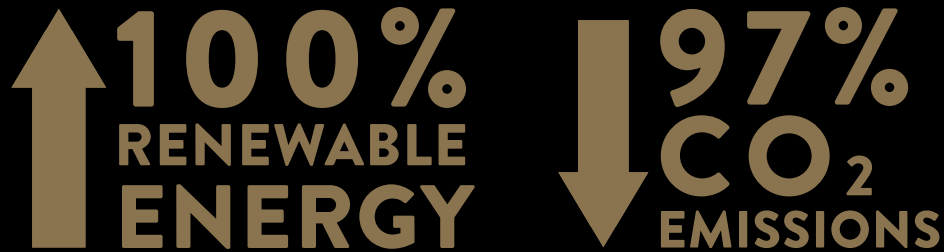

SUSTAINABILITY

Here at Kopparberg, our long-term success is built on three important values. Quality, people and respect for the environment. That's why we continuously seek to improve every part of the production process, including energy consumption, raw materials and packaging.

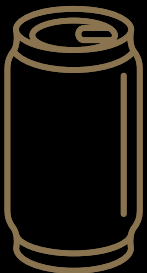

In 2016, the brewery made its biggest ever investment, building a new energy plant, aimed at producing 100% renewable energy and reducing our CO₂ emissions by 97%. As a result of the energy center, the brewery in Kopparberg now proudly manufactures all products in a brewery that is operated with climate-neutral fuels and recycled waste heat; and is used as a best in class example for other businesses around the world.

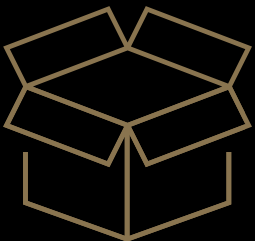

Through participation in the Beverage Industry Climate Initiative and cross-industry sharing of best practice, we can proudly say that we are using:

88% recycled glass in our bottles

62% recycled aluminium in our cans

50% recycled materials in boxes

SKÅL!
